

PRODUCT PORTFOLIO  
**WELDING TECHNOLOGY**

Torch Technology & Personal Protective Equipment

## THE COMPANY

EWS builds welding torches with commitment, expertise and a deep understanding of welding technology. With decades of experience, we develop high-end solutions for a wide range of welding applications. Welding torches, accessories and personal protective equipment. Made in Germany.

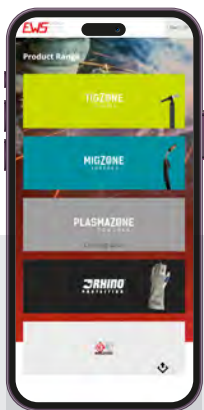

*Founded*  
2006

*Employees*  
~20

*Headquarters*  
Kleve (Lower Rhine, Germany)

*Type of Company*  
Second-generation  
family-run business

*Key Areas*  
Development, Production,  
Service, Sales

## SERVICE PROFILE – QUALITY WELDING EQUIPMENT

EWS stands for technical expertise, high availability, and reliable service. Our services go beyond series products and support dealers and industrial users throughout the entire product life cycle.

### Expert Advice 24/7

- Application-oriented consulting
- Torch development
- Support for short-term requirements

### Maintenance & Repair

- Incoming inspection & functional tests
- Spot orders thanks to stock management
- Transparent reports

### Special Solutions

- Welding torch design
- Dedicated development department
- Custom torches and components

### Private Label

- EWS technology under your own brand  
(depending on quantity)

DATA SHEETS AND THE COMPLETE PRODUCT RANGE  
ARE AVAILABLE ON OUR WEBSITE.

PROTECTION

## CLEARLY STRUCTURED TORCH EXPERTISE

EWS is a solution provider for industrial welding applications. We develop robust and powerful torch solutions that are consistently designed to meet industrial requirements.

## EASY TO REPAIR AND SUSTAINABLE

EWS torches are designed so that spare parts can be replaced quickly and easily. This reduces downtime, conserves resources, and extends the service life of the torch systems. Repairs can be carried out independently or by the EWS repair service.

## DEVELOPMENT AND MANUFACTURER DNA

EWS develops industrial torch solutions based on European and US development expertise. Development is market-oriented, application-focused, and clearly focused on industrial requirements. Production is carried out using high-quality components and with established partners in Europe and the US.

## STRONG PARTNERSHIPS

**Autogen Ritter**

Long-standing partner and OEM specialist for welding torches.

**CK Worldwide**

International standard in TIG welding.

EWS combines technical depth, clear product structure, and reliable partnerships to create a powerful portfolio for distributors and industrial users.

# TIGZONE® TORCHES

TIGZONE products are developed for high-quality TIG welding applications with high precision and long service life. The portfolio covers outputs from 80 to 500 amps and offers optimally matched torches and accessories from a single source.
